2

3 APPARATUS AND METHOD FOR CALIBRATING VOLTAGE SPIKE WAVEFORMS

4

5 ABSTRACT OF THE DISCLOSURE

6 An apparatus and method for calibrating single phase voltage
7 spikes used in testing single phase electrical equipment.
8 Capacitance is selected from a capacitor network in order to
9 adjust the single phase voltage spike so as to produce a
10 predetermined voltage spike waveform having particular waveform
11 characteristics that are required to perform survivability and
12 compatibility tests.
